

Liquid Sodium Silicate

JZ-DSS-L

Description: product name: liquid sodium silicate, water glass, foam flower base. liquid sodium silicate is strong alkali weak acid salt, It is very important silicon chemical products. It can be used in industry directly; also can be deep in solution to different products. Widely use in the national economy industry.

Application: as one material for silica gel, white carbon black, zeolite molecular sieves, ludox silicate series products; It is the material of detergent powder and soap; It is water softener; used in dying textile industry, bleach and sizing; widely used for casting machinery industry, grinding wheel production and metal preservatives; used in the manufacture of quick-drying cement in the construction industry, acid proof refractory material; adhesive electrode production.

Specification:

Specification	Unit	Type -2	Type-4
Fe Content	%, ≤	0.05	0.05
Insoluble water	%, ≤	0.40	0.60
Na ₂ O Content	%, ≥	8.2	9.5
Sio ₂ Content	%, ≥	26.0	22.1
Baume degrees (20°)		39.0-41.0	39.0-43.0
Density (20°)	g/cm ³	1.368-1.394	1.368-1.394
Modulus		3.1-3.4	2.2-2.5

Package: 250KG/drum

Attention:

Store in drums. Shipping in stable, loading in stable, no leaking, no collapse, no damage, cannot ship with acid and food products.
